

Example Homework Formatting

Name: Will Schievelbein

Q1A: One should concisely answer the question in English. One should use complete sentences and not answer more than the question asked. Type should be times new roman 12 pt font, single space.

Q1B: If one has some code to show with the question, the code should be included in courier new 8 pt, single space. Note that code is not a valid answer, but may be included so that the grader can see where a student made a mistake if the answer is not correct.

```
#Load Data
dataFile <- file.choose()
chunkSize <- 100000
con <- file(description=dataFile, open="r")
dat <- read.table(con, header=F, fill=TRUE)
close(con)
```

Q2: We are back to 12 pt font, single space. If the question asks for graphs, a student should provide small graphs with proper labeling below.
